RE: WT Docket Number 10-83: Southern California Regional Rail Authority and Maritime Communications/Land Mobile LLC License Modification, Spectrum Assignment and Waiver Request for Positive Train Control Use

Dear Ms. Dortch:

On behalf of the Ventura County Transportation Commission (VCTC), I am writing in support of the Southern California Regional Rail Authority's (SCRRA) and Maritime Communications/Land Mobile LLC's application for the assignment of critically needed radio spectrum and license modification to station WQGF318 for the development and implementation of Positive Train Control throughout the six counties of Southern California.

The VCTC is committed to safety and the safe operation of passenger and freight rail services through the implementation of Positive Train Control in our region by 2012. The FCC approval of the SCRRA filings is a critical step in the advancement of public safety by enabling a robust and interoperable train control system as mandated by the Rail Safety Act of 2008 (PL 110-432). For VCTC, Metrolink train service provides a viable travel alternative to driving alone for thousands of commuters each day. The VCTC supports the SCRRA's FCC application for radio spectrum in order to continue this important service.

Thank you for your timely consideration of and approval of this application.

Sincerely,

A handwritten signature in blue ink, appearing to read "Darren M. Kettle", is written over a horizontal line.

Darren M. Kettle
Executive Director

cc. John Fenton, SCRRA Executive Director
